

# Maximum quality of compaction and high production

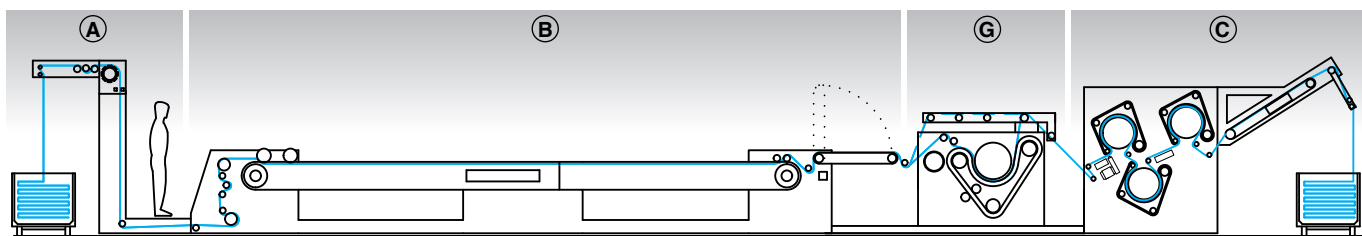

TOPKNIT A3 SUPERCOMPACT HIGH PRODUCTION COMPACTOR RANGE WITH INSPECTION BASIC VERSION

TOPKNIT A3 SUPERCOMPACT HIGH PRODUCTION COMPACTOR RANGE WITH INSPECTION AND NON-STOP ROLLING UP WITH GUMMING AND CUTTING SELVEDGE DEVICE OPTION

TOPKNIT A3 SUPERCOMPACT HIGH PRODUCTION COMPACTOR RANGE WITH RUBBER BELT UNIT SHRINKING UNIT (MULTIACTION)

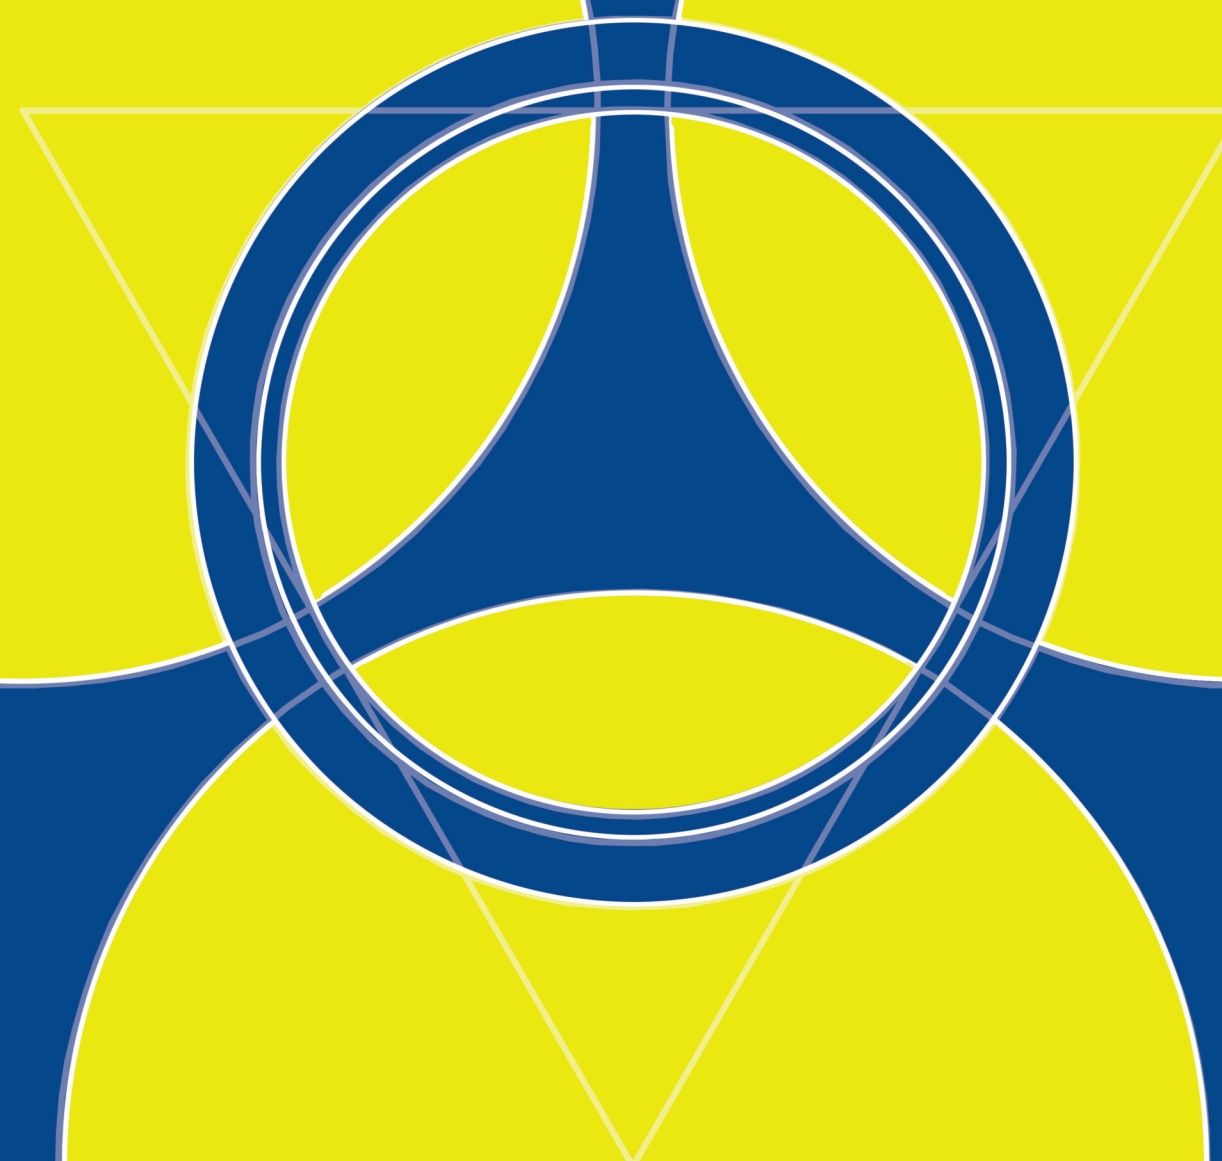

- A Entry dogal unit
- B Pins chain stenter
- C 3 felts compactor machine
- D Non-stop rolling up unit
- G Rubber belt shrinking unit (Optional)
- E Gumming and cutting selvedge device (Optional)

# Innovation in compacting treatment

# TOPKNIT® A3 - 500 SUPERCOMPACT™

SINTEC TEXTILE S.R.L.

VIA DEL LAVORO, 30 • 36016 THIENE (VI) • ITALY  
info@sintextextile.com • www.sintextextile.com

Agent:

non-stop rolling-up exit

## A3 SUPERCOMPACT → VERY SHORT "PAYBACK TIME"

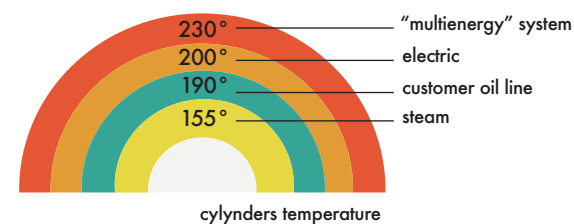

### ADVANTAGES:

- 1 - Production of about 35% more than traditional compactors: from 10/11 tons/day we pass 14 TONS/DAY
- 2 - Earn space at the factory, only 1 operator
- 3 - Exceptional compaction result (up to 16%), increased thank by 3 mechanical actions (12/13% on standard compactors)
- 4 - Less fabric weight reduction, thanks to no. 3 vaporizers - humidifiers installed (instead of the one only vaporizer-humidifier installed on standard compactors)

Possibility to treat all types of knitted fabrics, 100% cotton (jersey, piquet, fleece etc.), interlock, viscose, blended, cotton-synthetic fabrics or 100% synthetic fabrics (Lycra, polyester, etc.).

For the last ones, the "Multienergy" version, with high performance cylinders, Sintec patent pending, allows to perform the heatsetting process.

Operator's friendly machine, very easy to use, minimum maintenance required.

Erhardt + Leimer cutting device (optional)

Rubber belt unit (optional)

Motorized selvage uncurler device (optional)

Entry pins chain feeding detail
